

Polyethylene banded decant stand – 40L

Specification Sheet

Polyethylene banded decant stand – 40L (BDSP40)

Dimensions	650mm (L) x 650mm (w) x 31mm(H)
Capacity	40 Litres
Material	Polyethylene
Weight	9kg

Capture drips, leaks or overflow with this 40L mini bund.

A decanting bund is an ideal, economical solution for capturing spills whilst dispensing liquids. This small bund has been designed for storing and decanting from 20 litre drums.

- The small bund supports a 20 litre container on the top, allowing liquids to be decanted into a jug or bucket on the lower level.
- Liquid can be reclaimed through a 20mm drain.
- 40 litre sump capacity.
- Improves safety and reduces manual handling whilst capturing leaks, drips and spills.
- Tough, durable, polyethylene construction – resistant to most chemicals, oils and fuels and easily cleaned.
