

Corrosive substances safety cabinet - 100L storage capacity

APPLICATION

For the safe and secure indoor storage of Class 8 corrosive substances.

FEATURES

- Double wall construction with 40mm thermal barrier
- Vent ports with integral flash arrestors fitted on each side
- Two self-closing doors with stainless steel, three point bullet self-latching system
- Adjustable hydraulic door closure
- Flush mount handle and key lock
- Continuous piano hinge on door delivers smooth closure
- One adjustable shelf plus fixed base shelf, with chemical resistant thermoplastic coating
- Internal spill containment bund with suspended perforated floor
- Durable high-gloss powder-coated finish
- Grounding connector enables earthing if required
- Adjustable screw-in feet for optional elevation
- Safety and warning signage applied in accordance with Australian Standards.

SPECIFICATIONS

Product name	Corrosive substances safety cabinet
Code	CSC100
Maximum storage capacity	100 litres
Construction material/colour	Zinc anneal steel
External surface finish/colour	UV-stabilised polyester powder blue
Internal surface finish	Chemical-resistant thermo-plastic powder min. 100 micron DFT black
Bund	Chemically-resistant thermo-plastic lining
Doors	2
Shelves (including base)	2 perforated for free air movement chemically-resistant thermo-plastic coating
Shipping weight	97kg

DIMENSIONS (W x D x H)

External dimensions	1110mm x 510mm x 800mm
Internal dimensions	1010mm x 420mm x 550mm

Class 8: Corrosive Substances

Class 8 substances (corrosive substances) are substances which, by chemical action, will cause severe damage when in contact with living tissue, or, in the case of leakage, will materially damage, or even destroy, other goods or the means of transport.
