

Corrosive substances safety cabinet - 250L storage capacity

APPLICATION

For the safe and secure indoor storage of Class 8 corrosive substances.

FEATURES

- Double wall construction with 40mm thermal barrier
- Vent ports with integral flash arrestors fitted on each side
- Two self-closing doors with stainless steel, three point bullet self-latching system
- Adjustable hydraulic door closure
- Flush mount handle and key lock
- Continuous piano hinge on door delivers smooth closure
- Two adjustable shelves plus fixed base shelf, with chemical resistant thermoplastic coating
- Chemically-resistant thermoplastic powder coating on all internal surfaces for long-term protection against corrosive substances
- Durable UV stabilised thermosetting polyester powder coat finish
- Grounding connector enables earthing if required
- Adjustable screw-in feet for optional elevation
- Safety and warning signage applied in accordance with Australian Standards.

SPECIFICATIONS

| | |
|--------------------------------|--|
| Product name | Corrosive substances safety cabinet |
| Code | CSC250 |
| Maximum storage capacity | 250 litres |
| Construction material/colour | Zinc anneal steel |
| External surface finish/colour | UV-stabilised polyester powder blue |
| Internal surface finish | Chemical-resistant thermo-plastic powder min. 100 micron DFT black |
| Bund | Chemically-resistant thermo-plastic lining |
| Doors | 2 |
| Shelves (including base) | 3 perforated for free air movement chemically-resistant thermo-plastic coating |
| Shipping weight | 171kg |

DIMENSIONS (W x D x H)

| | |
|---------------------|-------------------------|
| External dimensions | 1110mm x 520mm x 1850mm |
| Internal dimensions | 1010mm x 420mm x 1600mm |

Class 8: Corrosive Substances

Class 8 substances (corrosive substances) are substances which, by chemical action, will cause severe damage when in contact with living tissue, or, in the case of leakage, will materially damage, or even destroy, other goods or the means of transport.
