

Drum bund: Powder Coated Steel – four drum

APPLICATION

Store up to four 205L drums on this heavy duty, powder-coated galvanised steel spill pallet and capture leaks, drips and spills of flammable and other liquids.

FEATURES

- Made from powder-coated galvanised steel – use with Class 3 Flammable Liquids or other compatible chemicals
- Accessible via forklift from both sides, even when loaded with four 205L drums
- Removable galvanised steel grates for easy cleaning and removal of spilled liquid or rainwater, or any other trapped debris
- Improves productivity by providing an easy-to-access, convenient, mobile bunded option for 205L drums or smaller containers
- Keeps personnel safe from accidental slips
- Integral sump prevents spilled liquids from contaminating factory floors, inventory or storm water drains
- Segregates liquids for easy identification
- Optional drum bund covers are available and used to prevent ingress of rainwater in the bund

SPECIFICATIONS

Product name	Drum bund powder coated steel – four drum
Code	DBPC4
Maximum sump capacity	243 litres
Construction material	Powder-coated galvanised steel
UDL	2000 kg

DIMENSIONS (W x D x H)

External dimensions	1204mm x 1354mm x 227mm
